LAPAROSCOPIC CHOLECYSTECTOMY

The surgery to remove the gallbladder with a laparoscope is called laparoscopic cholecystectomy. Performing this procedure with a laparoscope, rather than through the traditional 5-8 inch incision, reduces the recovery and hospital time. If the patient has infection, inflammation, adhesions, or bleeding, it may be necessary to change to the traditional form of open abdominal surgery—increasing recovery and hospital time.

Patient’s Initials

____ The details of the procedure including the anticipated benefits and material risks have been explained to me in terms I understand.

____ Alternative methods and therapies, their benefits, material risks and disadvantages have been explained to me.

____ I understand and accept that the most likely material risks and complications of laparoscopic cholecystectomy have been discussed with me and may include but are not limited to:

- adhesion formation
- bleeding or blood clot
- bowel obstruction
- hernia formation at a trocar site
- infection
- injury to intestines or major blood vessels
- injury to the bile duct (tube)
- pain
- scarring

____ I understand and accept that there are complications, including the remote risk of death or serious disability, that exist with any surgical procedure.

____ I understand and accept the risks of blood transfusion(s) that may be necessary.

____ I understand that tissue cannot heal without scarring and that how one scars is dependent on individual genetic characteristics. The physician will do his/her best to minimize scarring but cannot control its ultimate appearance.

____ I am aware that smoking during the pre- and postoperative periods could increase chances of complications.

____ I have informed the doctor of all my known allergies.

____ I have informed the doctor of all medications I am currently taking, including prescriptions, over-the-counter remedies, herbal therapies and supplements, aspirin, and any other recreational drug or alcohol use.

____ I have been advised whether I should avoid taking any or all of these medications on the days surrounding the procedure.

____ I understand that if my doctor becomes concerned during the course of the procedure, he/she may find it necessary to create an open chole (description of what an open chole is) in order to correct the problem.

____ I am aware and accept that no guarantees about the results of the procedure have been made.

____ I have been advised of the probable consequences of declining recommended or alternative therapies.

____ I have been informed of what to expect postoperatively, including but not limited to: estimated recovery time, anticipated activity level, and the possibility of additional procedures.

____ I understand that any tissue/specimen removed during the surgery may be sent to pathology for evaluation.

____ The doctor has answered all of my questions regarding this procedure.

I certify that I have read and understand this treatment agreement and that all blanks were filled in prior to my signature.
