DECOMPRESSIVE LUMBAR LAMINECTOMY

Decompressive lumbar laminectomy is a surgical procedure performed to relieve symptoms associated with spinal stenosis, a condition that is a by-product of aging and may be marked by degenerated (herniated) discs, thickened ligaments and the overgrowth of bone in the lumbar spine. During surgery, the overgrown bone and thickened ligaments that are causing pressure on the spinal canal and nerve roots are removed through an incision in the lower back.

Patient’s Initials

___ The details of the procedure including the anticipated benefits and material risks have been explained to me in terms I understand.

___ Alternative methods and therapies, their benefits, material risks and disadvantages have been explained to me.

___ I understand that the procedure may not fully or even partially relieve the complaint for which I am having the operation.

___ I understand and accept that the most likely material risks and complications of a decompressive lumbar laminectomy have been discussed with me and may include but are not limited to:

- bleeding
- infection
- spinal fluid leakage
- heart attack or other cardiac complication
- blood clot/phlebitis
- nerve root injury
- recurrence
- adverse reaction to anesthesia
- increased pain

___ I understand and accept that there are complications, including the remote risk of death or serious disability, that exist with any surgical procedure.

___ I understand and accept the risks of blood transfusion(s) that are unlikely but may be necessary.

___ I understand that tissue cannot heal without scarring and that how one scars is dependent on individual genetic characteristics. The physician will do his/her best to minimize scarring but cannot control its ultimate appearance.

___ I am aware that smoking during the pre- and postoperative periods could increase chances of complications.

___ I have informed the physician of all my known allergies.

___ I have informed the doctor of all medications I am currently taking, including prescriptions, over-the-counter remedies, herbal therapies and supplements, aspirin, and any other recreational drug or alcohol use.

___ I have been advised whether I should avoid taking any or all of these medications on the days surrounding the procedure.

___ I am aware and accept that no guarantees about the results of the procedure have been made.

___ I have been advised of the probable consequences of declining recommended or alternative therapies.

___ I have been informed of what to expect postoperatively, including but not limited to: estimated recovery time, anticipated activity level, and the possibility of additional procedures.

___ I understand that any tissue/specimen removed during the surgery may be sent to pathology for evaluation.

___ The doctor has answered all my questions regarding this procedure.
