HYSTERECTOMY

A hysterectomy is a surgical removal of the uterus, resulting in the inability to become pregnant (sterility). It may be done through the abdomen or the vagina.

The details of the procedure including the anticipated benefits and material risks have been explained to me in terms I understand.

Alternative methods and therapies, their benefits, material risks and disadvantages have been explained to me.

I understand and accept that the most likely material risks and complications of a hysterectomy have been discussed with me and may include but are not limited to:

- adhesion formation
- hormone deficiency
- bleeding
- infection
- blood clots
- injury to the bladder and/or ureters
- current symptoms/problems may not be improved or alleviated by surgery
- injury to the bowel or intestinal obstruction
- drug reactions
- loss of normal ovarian hormonal function
- osteoporosis

I understand and accept that there are complications, including the remote risk of death or serious disability, that exist with any surgical procedure.

I understand and accept the risks of blood transfusion(s) that may be necessary.

I understand that tissue cannot heal without scarring and that how one scars is dependent on individual genetic characteristics. The physician will do his/her best to minimize scarring but cannot control its ultimate appearance.

I am aware that smoking during the pre- and postoperative periods could increase chances of complications.

I have informed the doctor of all my known allergies.

I have informed the doctor of all medications I am currently taking, including prescriptions, over-the-counter remedies, herbal therapies and supplements, aspirin, and any other recreational drug or alcohol use.

I have been advised whether I should take any or all of these medications on the days surrounding the procedure.

I am aware and accept that no guarantees about the results of the procedure have been made.

I have been advised of the probable consequences of declining recommended or alternative therapies.

I have been informed of what to expect postoperatively, including but not limited to: estimated recovery time, anticipated activity level, and the possibility of additional procedures.

I understand that any tissue/specimen removed during the surgery may be sent to pathology for evaluation.

The doctor has answered all of my questions regarding this procedure.

I certify that I have read and understand this treatment agreement and that all blanks were filled in prior to my signature.

I authorize and direct _____________________, M.D., with associates or assistants of his or her choice, to perform a hysterectomy on _____________________at________________________________________.

I further authorize the physician(s) and assistants to do any other procedure that in their judgment may be necessary or advisable should unforeseen circumstances arise during the procedure.
