TRIGGER FINGER SURGERY

Tendons, which are responsible for flexing the fingers, pass through anatomic structures called “pulleys” within the palm and fingers. Inflammatory changes within tendon structures cause restriction of normal tendon motion. The usual solution for treating a trigger digit is surgery to open the pulley that is obstructing the nodule and keeping the tendon from sliding smoothly.

Patient’s Initials

_____ The details of the procedure including the anticipated benefits and material risks have been explained to me in terms I understand.

_____ Alternative methods and therapies, their benefits, material risks and disadvantages have been explained to me.

_____ I understand and accept that the most likely material risks and complications of trigger finger surgery have been discussed with me and may include but are not limited to:
  - allergic reaction to topical preparations
  - bleeding
  - change in skin sensation
  - damage to associated structures
  - infection
  - nonimprovement
  - pain
  - scarring
  - skin contour irregularities
  - tendon scarring
  - unsatisfactory results

_____ I understand and accept that there are complications, including the remote risk of death or serious disability, that exist with any surgical procedure.

_____ I understand that tissue cannot heal without scarring and that how one scars is dependent on individual genetic characteristics. The physician will do his/her best to minimize scarring but cannot control its ultimate appearance.

_____ I am aware that smoking during the pre- and postoperative periods could increase chances of complications.

_____ I have informed the doctor of all my known allergies.

_____ I have informed the doctor of all medications I am currently taking, including prescriptions, over-the-counter remedies, herbal therapies and supplements, aspirin, and any other recreational drug or alcohol use.

_____ I have been advised whether I should avoid taking any or all of these medications on the days surrounding the procedure.

_____ I am aware and accept that no guarantees about the results of the procedure have been made.

_____ I have been advised of the probable consequences of declining recommended or alternative therapies.

_____ I have been informed of what to expect postoperatively, including but not limited to: estimated recovery time, anticipated activity level, and the possibility of additional procedures.

_____ I understand that any tissue/specimen removed during the surgery may be sent to pathology for evaluation.

_____ The doctor has answered all of my questions regarding this procedure.

I certify that I have read and understand this treatment agreement and that all blanks were filled in prior to my signature.
